

ROBUST (MANUFACTURING) PROCESSES WIN.

ABOUT MARTY SCHAD & MPES

Marty Schad is a successful entrepreneur, technology and processing consulting professional. He specializes in developing optimized processing methods for manufacturing processes, helping companies to innovate, saves tons of cash and help determine areas of investments for new products.

Marty Schad has worked with well-known companies such as Bose, Corning and

Sycamore to help develop robust agile processes, data-driven engineering tools and improve overall manufacturing operations. His projects have had impacts worth 100s of millions of dollars. He is passionate about process development and has a keen eye on engineering fundamentals which have governed his success in all his endeavors, including within client teams. He engages all stakeholders including top level leaders to help them achieve their company's objectives.

MPES Consulting, a brainchild of Marty Schad, has its foundation in driving macro and micro level processing and engineering changes and thereby helping companies to develop robust new technologies and products, laying a foundation for success.

- ✓ **Process Engineering Expert**
- ✓ **Process Commercialization Expert**
- ✓ **Inventor**
- ✓ **Process Stewardship Expert**
- ✓ **Process Engineering Architect**

The work Marty did developing waterproof cone composites was outstanding. His development plans were aggressive but flawlessly executed. He found a cost effective solution with significantly higher performance than current Bose cones. The Neptune cone material he developed provided Bose with high value, intellectual property and demonstrable performance benefits.

– Development Manager at Bose

EXPERTISE

PROFIT MAXIMIZATION

Maximizing profits follows naturally from "Process Stewardship" and the development of robust processes. We maximize high-quality production yield and accelerate commercialization of research findings.

RISK REDUCTION

Creating novel manufacturing processes is a risky endeavor with huge upside. We help you create bold new processes and perfect current production.

TRUSTWORTHY PROCESSES

The process is the unseen but vital "heart" of all manufacturing operations. We build reliable processes that delight customers and are a pleasure to operate.

PROCESS STEWARDSHIP

Manage your process
risk with MPES
Consulting

Both research and
manufacturing
efforts

IDEA GENERATION TO COMMERCIALIZATION AND PROFITABILITY

MPES Process Engineering Expertise can Turbocharge your Product Commercialization Efforts!

HOW?

1

Create
MANUFACTURABLE
and scalable research
concepts.

2

Minimize time from first
prototype to full-scale
manufacturing.

3

Engineer robust & trouble-free production processes.
